

# WHICH HELMET IS CARRYING MRSA?

**GERMBLAST®**  
A HEALTHIER ENVIRONMENT BEGINS HERE.

## According to the CDC...

In 2017, there were over 119,000 bloodstream infections and over 20,000 deaths related to MRSA and MSSA.

**MRSA can survive on surfaces from seven days up to seven months.**

THE SOLUTION: GermBlast®

- **Kills** up to 99.99% of bacteria and viruses
- **Eliminates** odor (sweat, smoke, blood, etc.)
- **Sanitizes and disinfects** faster and more completely than conventional spray methods
- Delivers disinfecting solutions that are non-flammable, non-corrosive, and **environmentally safe**

**GermBlast® kills microorganisms in our environment to keep the fight outside the body.**

Preventing infections is unquestionably a critical component of student-athletes' safety. That's why GermBlast®, our innovative, germ-killing prevention process and technology, is so important. Our on-site sanitizing and disinfecting process, provided through multiple modalities, manages and kills bacteria and viruses where they live and hide.

With our preventative process, we kill microorganisms on athletic equipment and in training facilities to keep the fight against infection outside the body.
